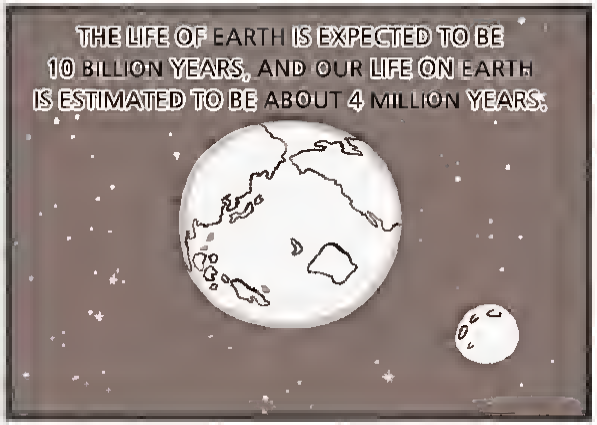
3-SEC STRIP

GALACTIC YEARS

IF HUMANS LEAVE THE EARTH IN
TENS OR HUNDREDS OF THOUSAND YEARS LATER

WOULD THE EARTH THINK
"THOSE ANNOYING EARTHLINGS ARE FINALLY GONE"?



THE LIFE OF EARTH IS EXPECTED TO BE
10 BILLION YEARS, AND OUR LIFE ON EARTH
IS ESTIMATED TO BE ABOUT 4 MILLION YEARS.

IF WE NORMALIZE THE LIFE OF EARTH TO HUMAN'S EXPECTED LIFE OF ABOUT 100 YEARS, HUMANS SPEND ONLY ABOUT 15 DAYS ON EARTH.
HUH? DID I SENSE SOMETHING?

PERHAPS MANKIND
IS NOT TOO GREAT
AFTER ALL IN THE
VASTNESS OF THE GALAXY
